The University of Osaka Institutional Knowledge Archive : OUKA

<https://ir.library.osaka-u.ac.jp/>

The University of Osaka

Dutch repository network: DAREnet (19 inst.)

The screenshot shows the DAREnet search interface. On the left, there's a sidebar with links like 'DAREnet', 'Cream of Science', 'Promise of Science', 'Repositories', 'Services', 'DARE', 'Contact', 'Search', 'Your publication on DAREnet?', 'HBO Knowledge Bank', 'News', 'RIVM latest branch at DAREnet tree', 'As of April 2007 the RIVM (Dutch National... read more)', 'German universities launch information platform about open access', 'The Universities of Bielefeld, Göttingen,... read more', and 'news overview'. The main area has tabs for 'DAREnet', 'Cream of Science', and 'Promise of Science'. A search form includes fields for 'Searchterm(s)', 'Part of authorname', 'Year', and 'Institute' (with a dropdown menu highlighted by a red oval). Below the search form, there's a section titled 'You can search in all institutions' with a list of institutions like Amsterdam University Press, Delft University of Technology, Eindhoven University of Technology, Erasmus University Rotterdam, KNW, Leiden University, and others. To the right, there's a sidebar with links for 'universities, scientific institutes, KNAW and NWO', 'prominent scientists in the Netherlands', and 'net website'.

The screenshot shows the KNAW Proefschriften search results page. The search term 'stem cell' was entered in the search bar. The results list 6 items, each with a thumbnail, title, author, year, location, and a link to 'biblografische informatie'. The results are as follows:

1. Hedgehog Wntinteraction in colorectal cancer
2006 Brink, G.R. van den, Hardwick, J.C.H.;
Gevonden in:
biblografische informatie
2. High dose chemotherapy with hematopoietic stem cell rescue for high risk breast cancer
2003 Redenhuus, S., Bonnenbal, M., Beex, L.V.A.M., Wagstaff, J.,
Gevonden in:
biblografische informatie
3. Successful autologous stem cell transplantation in a patient with chronic inflammatory demyelinating polyneuropathy [letter]
2002 Vermeulen, M., Oers, M.H.J. van;
Gevonden in:
biblografische informatie
4. In vitro migratory capacity of CD34+ cells is related to hematopoietic recovery after autologous stem cell transplantation
2001 Voermanne, C., Koel, M.L.K., Redenhuus, S., Leisa, H. van der,.....
Gevonden in:
biblografische informatie
5. Stem cell transfusion as a new method for the induction of tolerance in organ transplantation
1997 Vries-van der Zwan, H.M. de, Pol, M.A. van der, Besseling, A.C., Waal, L.P. de,.....
Gevonden in:
biblografische informatie
6. Analysis of variation in results of CD34+ hematopoietic progenitor cell enumeration in a multicenter study
1997 Gratama, J.W., Kraan, J., Levering, W., Bockstaal, D.R. van,.....
Gevonden in:
biblografische informatie

DRIVER Portal

Welcome to the DRIVER Support website

Here you can access information and support relating to Open Access and digital repositories. Digital repositories can help make research information more widely available, more widely used, and improve the process of research itself. Information of interest to specific user groups is available as well as information about the DRIVER project.

This site holds details on the state of development of repositories in different European countries and how you can join this growing European network.

You may share information and news from your own country via the [DRIVER Wiki](#) and can benefit from the experience of others, and share your experiences, through the [Mentor Service](#).

You can also want to suggest events or announce news on this site that other visitors may find useful.

For access to DRIVER Tools, DRIVER Search and to access and re-use the DRIVER Infrastructure please go to the DRIVER Portal <http://www.driver-community.eu/>.

Website maintained by SHERPA © 2007, DRIVER - Digital Repository Infrastructure Vision for European Research Reviewed: 05-Nov-2007

<http://www.driver-community.eu/index.php>

Welcome to the DRIVER website, portal to the European research information.

Please note that the portal is currently at its testing phase. It may therefore run relatively slow. DRIVER endeavours to rectify this in due course.

Use this site to access various DRIVER products and services, such as the [DRIVER Support site](#). Here you will find information about the project itself and its relevance to researchers, institutional and repository managers, funding agencies and others, as well as information about building repositories and activities in European countries. The DRIVER website also give you access to the [DRIVER Guidelines](#) and the [DRIVER wiki](#). The DRIVER portal offers a number of features and characteristics that are described below. These will become available soon. More specifically:

Features & Characteristics

- > Advanced searching capabilities
- > Use of Collections and Communities allowing virtual views on the data
- > Personalized services that allow registered users to systematically filter their searches based on their individual research interests
- > Dynamic growth of the DRIVER content by real-time repository data harvesting
- > Distributed and scalable infrastructure supporting
 - > dynamic deployment of DRIVER nodes and services
 - > automatic formation of communities reflecting user interest
 - > provision of existing DRIVER services to other service providers
- > Coming soon
 - > Browsing and navigating capabilities
 - > User and community related recommendation and alerting services
 - > Repository managers' tools for easy registration and data quality feedback

Search in Repositories

DRIVER II

- ▶ European Confederation of Digital Repositories
- ▶ state-of-the-art and future-direction studies
- ▶ inclusion of non-textual and/or non-publication content
- ▶ 'enhanced publications' (presentations / datasets)
- ▶ from test-bed to production-quality infrastructure
- ▶ expand geographical coverage
- ▶ escalate dissemination, training and community building activities

Enhanced publications

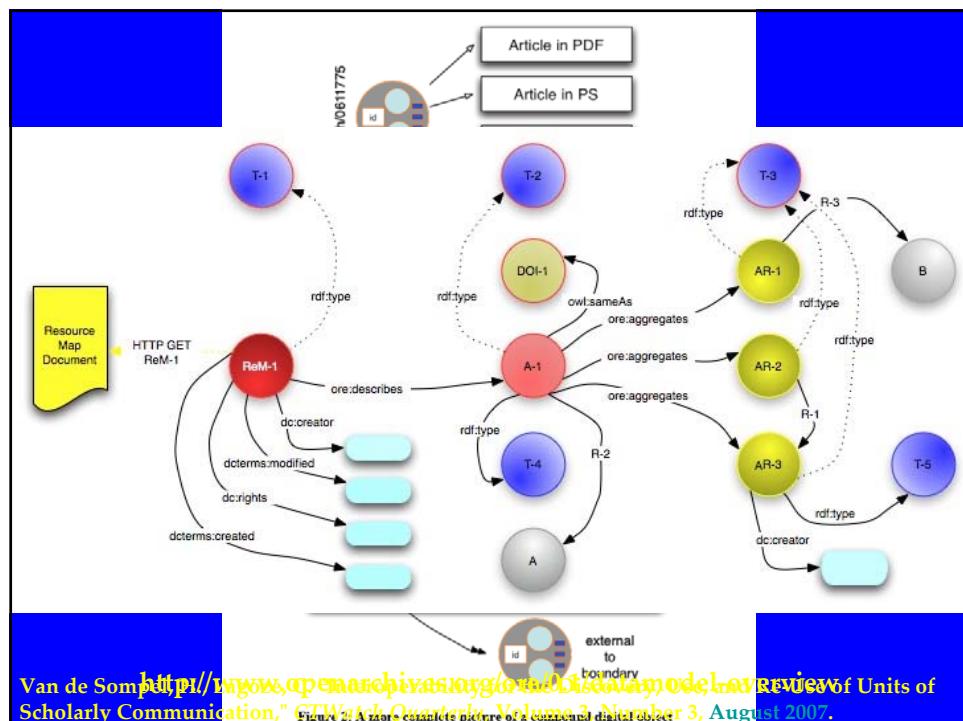

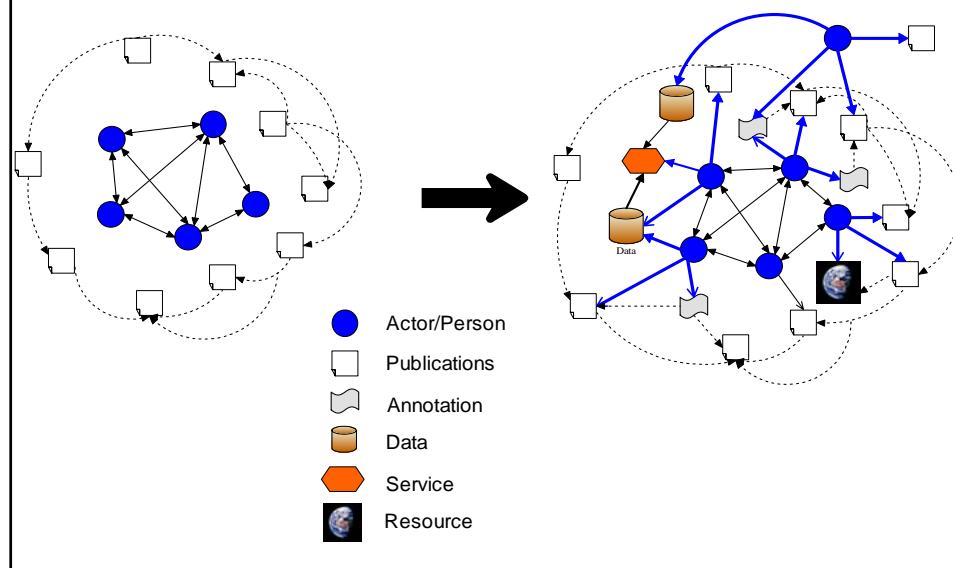

PDF is good for viewing and printing only

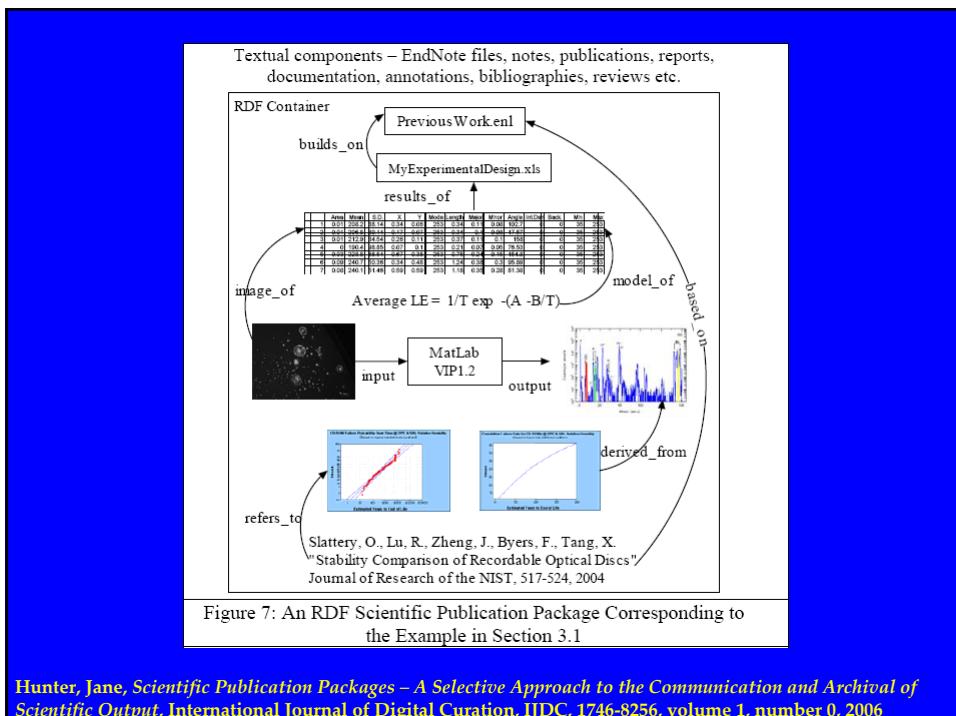

- ▶ no structure
- ▶ no components
- ▶ no 'knowledge' about the document's content (methods, citations, data)

We have to do better. Three examples

1. Information Networks (model)
2. Object Re-use and Exchange (OAI-ORE, developing standard)
3. Scientific Publication Package (experiment)

Documents → Integrated Information Networks

Hunter, Jane, *Scientific Publication Packages – A Selective Approach to the Communication and Archival of Scientific Output*, International Journal of Digital Curation, IJDC, 1746-8256, volume 1, number 0, 2006

Persistent identifiers (NL)

For objects: national bibliographic number (URN:NBN:nl ...)

For authors: digital author identifier (DAI)
 DAI = Dutch national project
 -> a unique identification for each (Dutch) researcher

- ▶ in the catalogue
- ▶ in the institutional repository
- ▶ in the Current Research Information System

- Description: In deze studie onderzoekt A. Prinsen hoe theologien op het nihilisme van Friedrich Nietzsche (1844-1900) hebben gereageerd. Nietzsche ondernam een heide aanval op het christelijk geloof. Het werk van Nietzsche staat voor een radicale breuk met bijbel, kerk en geloof. Hij proclameerde de dood van God. Waarom nam Nietzsche deze positie in...
