The University of Osaka

Come close, IR and ILDD! Case of Barrel

SUZUKI Masako* and SUGITA Shigeki**

*** University Library, Otaru University of Commerce, JAPAN**

**** University Library, Hokkaido University, JAPAN**

Introduction #1

- **For repository sustainability,
most important and most
difficult is...**

**Organic growth of
contents !!**

Introduction #2

- Contents are at researchers hand, NOT librarians
- They approve IR plans

However,

- “Busy”, “Later”, “Not so far”...
- They forget messy things right now

Keep approach!

Introduction #3

- **Approach, Approach, Approach!**
 - ex. HUSCAP (IR of Hokkaido Univ.)
 - Send IR download statistics to the authors by email
 - Hand IR leaflets to ILDD requesting users
 - Check Web of Science and request depositing papers Cf. OUC does not have WoS license
- **OUC encourages researchers to deposit their papers **by notifying ILDD demands****

Institutional Repository and Interlibrary Document Delivery

- Different in various ways
- However,
 - Both document delivery services!
 - Both against the Serials Crisis!
- 1 download from an IR is equivalent to handling 1 ILDD request
 - as performance of library for research community

Some differences #1

- **IR**
 - Once deposited, available forever
 - One click access
 - Open access, of course!
- **ILDD**
 - Copy again and again on requests
 - Offer and wait
 - **35 JPY per a page in Japan**
 - which is nothing more than the copy and postal fee (NOT pay ILL/DD staffs)

Some differences #2

- **IR**
 - Authors' action for readers
 - Authors could know how frequently it's downloaded
- **ILDD**
 - Interlibrary
 - Authors neglected!

ILDD

supplied by holding library

- Prof. A needs a paper by Prof. C
- Library B holds the paper

Accelerate Self-archiving by ILDD modeled after IR supplied by author library

Gathering ILDD requests for the faculties' works
by providing them free of charge

Benefits #1

- **IR**
 - Yet another approach to reseachers
 - Increase contents
 - No more ILDD
- **ILDD**
 - More OA, less copying papers

Benefits #2

- **Researchers**
 - Rapid and Free
 - Catch demands through ILDD and make it OA
 - Authors could know how frequently it's downloaded

Thank you!

- **Wish better world-wide ILDD framework**

– **SUZUKI Masako**

- **jako@office.otaru-uc.ac.jp**

– **SUGITA Shigeki**

- **sugita@lib.hokudai.ac.jp**
