CSI : Cyberscience infrastructure

*Cyberscience infrastructure is crucial
in international collaborations
and competitions in science and industry*

Virtual research organization

Worldwide Software and DB

Cultivation of human resources
Accumulation of know-how

**Provision of scientific contents and
formulation of institutional repositories**

By collaboration of NII and university libraries

**Improvement of computing resources (e.g. next-
generation super computers) in research institutions**

Practical development of research grid

Development of security system for research institutions

By collaboration of NII and university computing centers

**Formulation of next-generation
scientific information network**

Contribution
to industry
and society

International
contribution
and
partnership
