Growth of CURATOR's contents

What's "Everything Welcome" policy?

Under the development policy of "Everything Welcome", we have built our repository to help researchers provide their research outcome. As a result, CURATOR offers a variety of contents, including scholarly articles and unique image data.

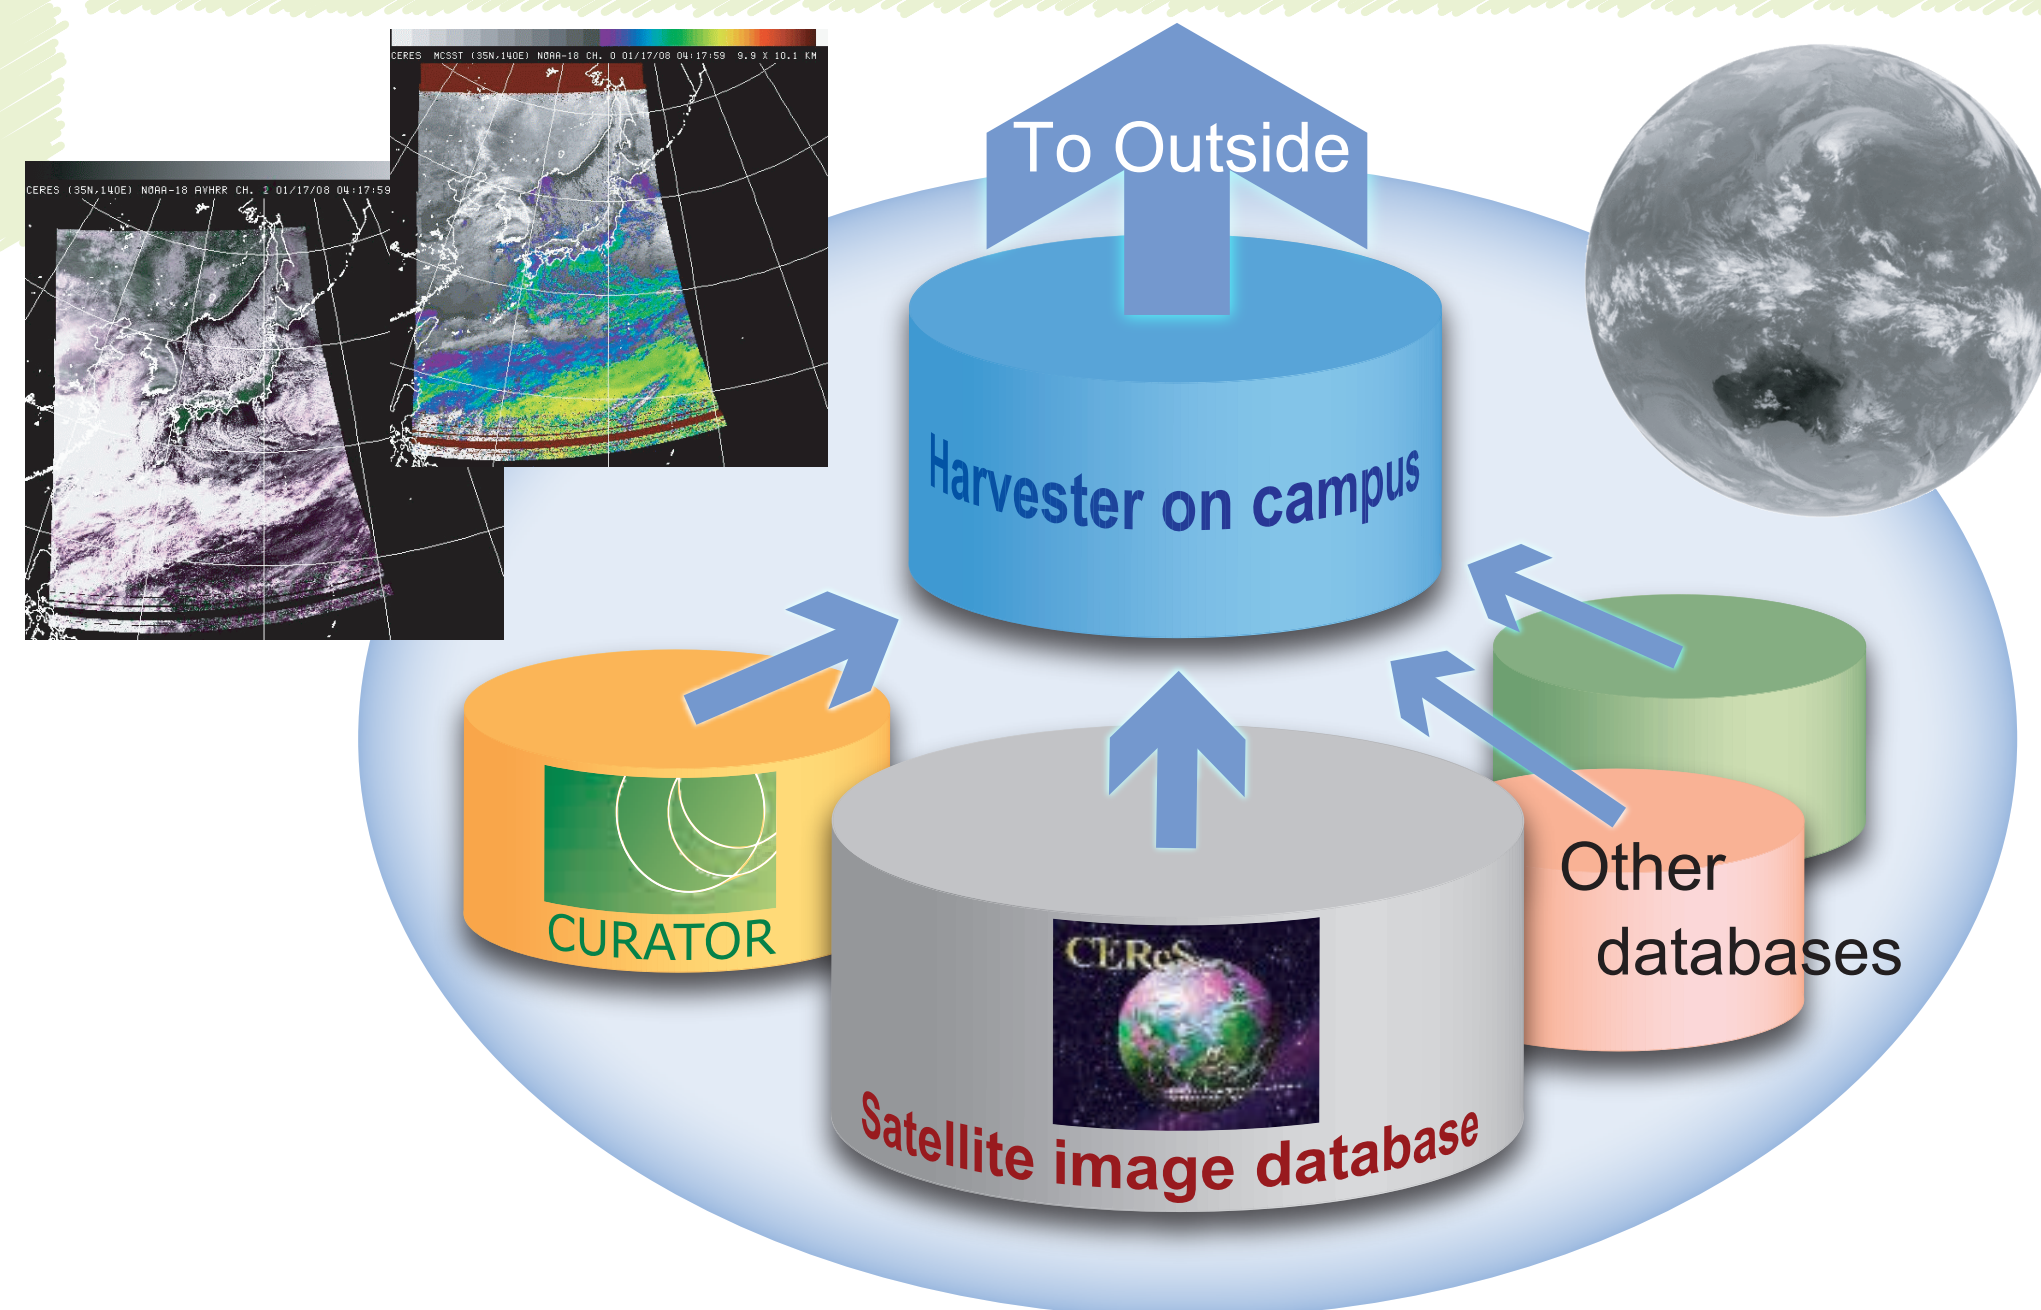

Everything Welcome: Design images with 3D animations

Images of industrial designs created by alumni are research outcome deposited under the "everything welcome" policy. After the complicated right clearance processes to gain permissions from the designers and the advertisers, those images were made open access, to some of which we added 3D animations.

Everything Welcome: Satellite image data

We are currently in preparation to provide another type of unique contents, which are satellite image data. This is a plan to harvest data both from CURATOR and the satellite databases to provide data to outside users.

Worldwide Dissemination: Case1. Partnership with Scirus

We entered into a partnership with Scirus, Elsevier's free science-specific search engine, in 2006.

Our cooperative efforts made it possible to search Japanese contents in Japanese.
