The University of Osaka

A Fragment of the Chinese *Mañjuśrīnāmasaṃgīti* in Uigur Script from Turfan*

Peter Zieme

The *Mañjuśrīnāmasaṃgītisūtra* (*Mns*) as the opening sūtra of the Tantric canon is widespread and famous among Buddhists in all Asian countries. In the Yuan period it was translated and copied several times by Uigur Buddhists, but not only are there several translations of the text,⁽¹⁾ but also there exists at least one blockprint containing a transcription of the Sanskrit version written in Uigur and Brāhmī scripts.⁽²⁾

The fragment belonging to the *Berlin-Brandenburgische Akademie der Wissenschaften* that I intend to edit here, contains a part of a transcription of the Chinese text of the *Mns* (= T. 1190). I want to express my sincere thanks to Mr. Y. Yoshida who

* I am indebted to Mr. Geoff Childs for improving my English.

- (1) BT VIII B. The name of the translator is given as 迦魯拏答思 *Karūṇadāsa*, cf. now H. Franke, *Multilinguisme dans la Chine des Yüan: Le comité de rédaction du Canon bouddhique* (1285-1287), in: *Académie des Inscriptions & Belles-lettres, Comptes rendus des séances de l'année 1994 Juillet-Octobre*, Paris 1994, 622-623; but according to a letter from Dunhuang first edited by T. Moriyasu, the translator was 安藏 *Anzang*, cf. J. Hamilton, *Etude nouvelle de la lettre Pelliot Ouïgour 16 bis d'un bouddhiste d'époque mongole*, in: *Turfan and Tun-Huang: The Texts. Encounter of Civilizations on the Silk Route*, ed. by A. Cadonna, Florence 1982, 97-121.
- (2) SHT I, pl. 34 Ohne Kat.-Nr. (now: SHT 6733), cf. SHT IV, p. 352; G. Kara, *Weiteres über die uigurische Nāmasaṃgīti*, in: *Altorientalische Forschungen VIII* (1981), p. 233. Preserved are the following parts (according to R.M. Davidson, *The Litany of Names of Mañjuśrī. Text and Translation of the Mañjuśrīnāmasaṃgīti*, in: *Mélanges chinois et bouddhiques XX* (1981), 1-69): śloka 1-3, 8-10, 39-45, 102-103, 107-111, 120-125, 152-155, 161-162, *om sarvadharmābhāvasvabhāvaviśuddhāvajra*, 167 as well as the end: *āryamāyājālāt śoḍaśasahasrikān mahāyoga-tantrāntaḥpātisaṃmādhijālapaṭalād bhagavattathāgataśākyamunibhāṣitā bhagavato mañjuśrījñānasattvasya paramārthā nāmasaṃgītiḥ parisamāptā*.

quickly identified it during his short stay in Berlin in December, 1995. He also mentioned to me that similar pieces were found in the St. Petersburg Collection, the study of which is undertaken by M. Shōgaito. In the meantime, the latter's edition of the Petersburg fragments has already come out.⁽³⁾ These pieces are written in different types of cursive Uigur script, but none of them is equal to the handwriting of the Berlin fragment. The editor has numbered the Petersburg pieces from A to H, and thus the Berlin fragment could be called "text I". It belongs to the newly recovered fragments of the Turfan Collection of Berlin. The front side is a part of a Chinese blockprint of a *Prajñāpāramitā sūtra*.⁽⁴⁾

The fragment Ch/U 8021 (MIK 028476) [T II 1435] belongs to the growing number of texts which contain transcriptions of Chinese versions. The different methods of using Chinese Buddhist texts for chanting or recitation by Non-Chinese is a fascinating topic in itself, but it gains even more importance if one considers the status of these texts as sources for the phonological reconstruction of Old or Middle Chinese. Although the Uigur alphabet is even less precise for representing the Chinese sounds than its Sogdian predecessor,⁽⁵⁾ these transcriptions when collected together may become an additional valuable treasure for further research.

In line 18 of the fragment there is one Uigur sentence which can be interpreted as a note by the writer: [...]*ji šabi bitidim sadu bolzun* "(I), the novice [...]*ji*, have written (it). May it be *sādhu*." Unfortunately, the name itself is missing.

The *Mns* is a praise of the Bodhisattva Mañjuśrī through the enumeration of

(3) Shōg. 1995b. Text F has 11 unidentified lines (see Shōg. 1995b, p. 23), before it starts with the *Mns*.

(4) The precise localization will be hopefully given in one of the forthcoming volumes of the catalogue of the Chinese texts of the Turfan Collection of the Berlin-Brandenburgische Akademie der Wissenschaften.

(5) For Chinese texts in Sogdian script see Yoshida. He gives valuable comments on some forms in the so-called Uigur script, too.

numerous epithets. For understanding the text passage I give here first a translation of the relevant part which corresponds to the stanzas 78 till 83:⁽⁶⁾

01-04 = skt. 78 As the conch of the Dharma he has great sound, and as the gong of the Dharma he has great noise; proclaiming the nature of the *apraṭiṣṭhita nirvāṇa* he is the great drum of the Dharma in the ten directions.

05-08 = skt. 79 Among those without form and with form he is the foremost, with various forms made from thought. Being the majesty in various forms, all his forms are reflections.

09-12 = skt. 80 Among the invincible ones he has great fame, he is the great lord in the triple sphere. He is the best equipped on the path, he is the ornament of the Dharma in great sovereignty.

13-15a = skt. 81 The only youth in the triple world, the elder, the honoured one, the lord of the four existences. Adorned with the thirty-two marks, he is loved in the triple world and handsome.

16-20 = skt. 82 Without awe he is the best teacher for the world. Honoured in the world, his mind is without selfishness. He expounds, and he is the greatest.

21 = skt. 83 His active experience of the extension of space, he is the ocean of the Omniscient's gnosis. He splits the shell around the egg of ignorance and tears the net of existence.

The passage of the Chinese Mns in Uigur script

As evident from the transliteration as well as from the facsimile, the text is written in Uigur cursive script mixed with Chinese characters. It seems that the scribe, when writing Chinese characters, was using only simple ones such as 法 (l. 01), 中 (l. 04) etc.

(6) Based on the translation of R.M. Davidson, *The Litany of Names of Mañjuśrī*. Text and Translation of the *Mañjuśrīnāmasaṃgīti*, in: *Mélanges chinois et bouddhiques* XX (1981), pp.28-29.

First line: Transliteration of the text of the verso side of Ch/U 8021 (MIK 028476).

Second line: Text of the Chin. *Mns* T. 1190, Vol. 20, p. 828b12-22.

住	zhù	ču (11)	Shōg. 1995b (cw)

(10) In 河西 dialect the normal equivalent for final -t is -r.

諸	zhū	ču (7)	Shōg. 1995b (cw)
莊	zhuāng	čo (15)	P. Y. tšwan ⁽¹¹⁾
自	zì	si (10)	Tak. 0313
尊	zūn	sun (14, 19)	Shōg. 1982, p. 134 (tsun, sun)
最	zuì	sui (11)	Tak. 0209 (tswe).

Conclusion

Presenting the material of this fragment only in the form of a list accompanied by some references to further occurrences⁽¹²⁾ seems to be justified in view of the fact that there are still more texts of this kind, especially the one G. Kara is working on.⁽¹³⁾ Editing these texts is a preliminary stage, and one may hope that the research of the whole “corpus” of Chinese characters in Uigur transcription will be undertaken some day.⁽¹⁴⁾

A special feature of the text under discussion is its mixed character: the text is given either in Chinese or in Uigur transcription, very similar to a passage in the so-

(11) The loss of final *-ŋ* is typical for the elder Uigur transcriptions.

(12) In the cases where I could not find parallel forms in Uigur or Sogdian script I gave a reference in another script or to the reconstructed form(s) according to Pulleyblank.

(13) Cf. G. Kara, *Mittelchinesisch im Spätuigurischen*, in: *Ägypten Vorderasien Turfan. Probleme der Edition und Bearbeitung altorientalistischer Handschriften*, Tagung in Berlin, Mai 1987, hrsg. von H. Klengel und W. Sundermann, Berlin 1991, pp. 129-133.

(14) After D. Sinor's initial steps in the thirties, it was B. Csongor who made the next contribution with some articles on this subject: Chinese in the Uighur Script of the T'ang period, in: AOH 2 (1953), 73-121; Some More Chinese Glosses in Uighur Script, in: AOH 4 (1954), 251-257; Chinese glosses in Uighur Texts Written in Brahmi, in: AOH 15 (1962), 49-53. Later M. Shōgaito published his rather comprehensive study.: Shōg. 1982. Now see also Kahar Barat, A Turkic Chinese Transcription System, paper presented at the 38th PIAC meeting in Tōkyō in 1995. “Real” glosses in Uigur script are preserved in the fragment Ch 2931 verso: S. Raschmann, T. Takata, Ein chinesischer Turfan-Text mit uigurischen phonetischen Glossen, in: AoF 20 (1993), 391-396. A list of Chinese words in Uigur transcription in Xuanzang's biography was compiled by M. Ölmez: Uyurca Xuanzang-Biyograisindeki Çince Alıntılar, in: Türk Dilleri Araştırmaları 4 (1995), 109-143.

called *Insadi-sūtra* edited by S. Tezcan.⁽¹⁵⁾ Generally one observes that simple Chinese characters were written in their own way, while more complex ones were given in Uigur script. In this respect, this *Mns* manuscript differs from those edited by M. Shōgaito. In principle, I agree with his conclusion, that “Chinese Buddhist texts were read in the Uighur reading of Chinese characters, a practice similar to the Japanese reading of Chinese characters.”⁽¹⁶⁾
