Osaka University

Preparation of Manuscripts

The authors are required to prepare the manuscripts in English, French or German and submit them with extra two copies to

Editor in Chief, Osaka Journal of Mathematics,
Department of Mathematics, Graduate School of Science, Osaka University,
1-1 Machikaneyama-cho, Toyonaka, Osaka 560-0043, Japan

Manuscripts should be typed and legible. Those prepared on \TeX should be typeset in 12 point fonts with enough line intervals and margins. The authors are required to observe the following style rules:

1. Abstract or summary should not be attached. The author's address together with his (or her) affiliation is to be written on the last page after the references.
2. In the margin of the first page of the manuscript, write a proposed running head.
3. The references should be quoted by numbers, not by the abbreviations of the names or titles. In the Reference the entries should be written as in the next examples:

[1] H.F. Baker: *On finite groups*, *Canad. J. Math.* **25** (1973), 35–48.
[2] C.M. Davis: *Group Theory*, Springer, Berlin-Heidelberg-New York, 1965.
4. Theorem, Proposition, Lemma, Corollary should be written as **Theorem, Proposition, Lemma, Corollary** in the bold face, while Definition, Notation, Remark, Example, Acknowledgement should be written in romans as DEFINITION, NOTATION, REMARK, EXAMPLE, ACKNOWLEDGEMENT with small capitals from the second letter on Proof is written in romans.
5. Figures should be drawn in black ink and prepared in separate sheets with adequate numbering.

The authors will be required to make the marking of special letters such as boldface, script, German, Greek letters, etc. following the instruction to be mailed after their articles are accepted for publication by the editorial board.

CONTENTS

HUJIKATA, H. and NISHIDA, K.: When is $\Lambda_1 \otimes \Lambda_2$ hereditary ?	493
HOSHINO, M. and SUMIOKA, T.: Injective pairs in perfect rings.	501
SATO, Y.: 3-dimensional homology handles and minimal second betti numbers of 4-manifolds.	509
LEE, S.-Y. and PARK, C.-Y.: On the modified Goeritz matrices of 2-periodic links.	529
KAWAMURA, T.: The unknotting numbers of 10_{139} and 10_{152} are 4.	539
MINAMI, H.: Note on complex k -groups of compact Lie groups with funda- mental group of prime order.	547
ADACHI, T. and MAEDA, S.: Length spectrum of circles in a complex projec- tive space.	553
ITOH, M.: Compact Einstein-Weyl manifolds and the associated constant.	567
MAITANI, F.: Conformal welding of annuli.	579
AIHARA, Y.: Finiteness theorems for meromorphic mappings.	593
HAYASHIMOTO, A.: On the complete system of finite order for CR mappings and its application.	617
NISHTANI, T. and TAKAYAMA, M.: Characteristic initial boundary value prob- lems for symmetric hyperbolic systems.	629
TAKANOBU, S.: On the trace norm estimate of the trotter product formula for schrödinger operators.	659
KUWAE, K.: Functional calculus for Dirichlet forms.	683
HINO, M.: Existence of invariant measures for diffusion processes on a wiener space.	717
