Preparation of Manuscripts

The authors are required to prepare the manuscripts in English, French or German and submit them with extra two copies to

Editor in Chief, Osaka Journal of Mathematics,
Department of Mathematics, Graduate School of Science, Osaka University,
1-1 Machikaneyama-cho, Toyonaka, Osaka 560, Japan

Manuscripts should be typed and legible. Those prepared on T_EX should be typeset in 12 point fonts with enough line intervals and margins. The authors are required to observe the following style rules:

1. Abstract or summary should not be attached. The author's address together with his (or her) affiliation is to be written on the last page after the references.
2. In the margin of the first page of the manuscript, write a proposed running head.
3. The references should be quoted by numbers, not by the abbreviations of the names or titles. In the Reference the entries should be written as in the next examples:

[1] H.F. Baker: *On finite groups*, Canad. J. Math. **25** (1973), 35-48.

[2] C.M. Davis: *Group theory*, Springer, Berlin-Heidelberg-NewYork, 1965.

4. Theorem, Proposition, Lemma, Corollary should be written as **Theorem**, **Proposition**, **Lemma**, **Corollary** in the bold face, while Definition, Notation, Remark, Example, Acknowledgement should be written in romans as DEFINITION, NOTATION, REMARK, EXAMPLE, ACKNOWLEDGEMENT with small capitals from the second letter on. Proof is written in romans.
5. Figures should be drawn in black ink and prepared in separate sheets with adequate numbering.

The authors will be required to make the marking of special letters such as boldface, script, German, Greek letters, etc. following the instructions to be mailed after their articles are accepted for publication by the editorial board.

CONTENTS

SORDONI, V.: On the well posedness of the Cauchy problem for a class of hyperbolic operators with multiple involutive characteristics.	589
AKAMATSU, T.: Hypoellipticity of second order operators in \mathbf{R}^2 of the form $fX^2 + Y + g$	607
WATANABE, A.: Normal subgroups and multiplicities of indecomposable modules.	629
FUKUSHIMA, H.: On p -radical groups G and the nilpotency indices of $J(kG)$ II.	637
SUMIOKA, T. and TOZAKI, S.: On almost QF rings.	649
BALICO, E. and KEEM, C.: Families of smooth k -gonal curves with another fixed pencil.	663
CHI, Q.-S. and MO, X.: The moduli space of branched superminimal surfaces of a fixed degree, genus and conformal structure in the four-sphere.	669
TSUKADA, K.: Totally geodesic hypersurfaces of naturally reductive homogeneous spaces.	697
HIROSE, S.: Periodic automorphisms of surfaces and cobordism.	709
BIASI, C. and SAEKI, O.: On bordism invariance of an obstruction to topological embeddings.	729
AUCKLY, D.: The Thurston norm and three-dimensional Seiberg-Witten theory.	737
SHIBUYA, T.: Self Δ -equivalence of ribbon links.	751
TAMURA, M.: The average edge order of triangulations of 3-manifolds	761
NISHIMURA, Y.: The K_* -local type of the orbit manifold $(S^{2m+1} \times S^1)/D_q$ by the dihedral group D_q	775
HONKASALO, H. and LAITINEN, E.: Equivariant Lefschetz classes in Alexander-Spanier cohomology.	793
