GENERAL INDEX

Volume 1 (1949) — Volume 10 (1958)

ANASAKO, Yukio and NAGUMO, Mitio: On Perron's method for the semi-linear hyperbolic system of partial differen- tial equations in two independent variables.	7 179-184
ANZAI, Hirotada: A remark on spectral measures of the flow of Brownian motion.	1 95-97
_____: Random ergodic theorem with finite possible states.	2 43-49
_____: Mixing up property of Brownian motion.	2 51-58
_____: Ergodic skew product transformations on the torus.	3 83-99
AOTANI, Kiyo: Some remarks on the uniform space. . . .	5 93-98
ASAMI, Takeo: On the condition of a Stein variety. . . .	9 215-219
ASANO, Keizo: Über Hauptidealring mit Kettenatz. . . .	1 52-61
_____: Zur Arithmetik in Schiefringen. I.	1 98-134
DIEUDONNÉ, Jean: Remarques sur la réduction mod. \mathfrak{p} des groupes linéaires algébriques.	10 75-82
ENOMOTO, Shizu: Sur une totalisation dans les espaces de plusieurs dimensions. I.	7 69-102
_____: Sur une totalisation dans les espaces de plusieurs dimensions. II.	7 157-178
_____: Boolean algebras and fields of sets.	10 99-115
_____: and KAMETANI, Syunzi: On differentiation of set-functions with some of its applications.	3 1-9
FOX, Ralph H.: On knots whose points are fixed under a periodic transformation of the 3-sphere.	10 31-35
_____: Congruence classes of knots.	10 37-41
FUJIWARA, Tsuyoshi: On the existence of algebraically closed algebraic extensions.	8 23-33
GRÜN, Otto: Beiträge zur Gruppentheorie V über endliche p -Gruppen.	5 117-146
HARADA, Shigeharu: An existence proof of the generalized Green function.	5 59-63
HASHIMOTO, Junji: Direct, subdirect decompositions and congruence relations.	9 87-112
_____: Betweenness geometry.	10 147-158
HASHIZUME, Yoko: On the uniqueness of the decomposition of a link.	10 283-300

HOMMA, Tatsuo: On the existence of unknotted polygons on 2-manifolds in E^3	6	129-134
— and KINOSHITA, Shin'ichi: On a topological characterization of the dilatation in E^3	6	135-143
— and KINOSHITA, Shin'ichi: On homeomor- phisms which are regular except for a finite number of points.	7	29-37
— and TERASAKA, Hidetaka: On the structure of the plane translation of Brouwer.	5	233-266
HOSOKAWA, Fujitsugu: On ∇ -polynomials of links.	10	273-282
HU, Sze-tsen: Extensions and classification of maps.	2	165-209
IKEDA, Masatoshi: Some generalizations of quasi-Frobenius rings.	3	227-239
— : A characterization of quasi-Frobenius rings.	4	203-209
— : On a theorem of Kaplansky.	4	235-240
— : On a theorem of Gaschütz.	5	53-58
— and NAKAYAMA, Tadashi: Supplementary re- marks on Frobeniusean algebras. II.	2	7-12
IKEDA, Sadao: On the estimation of the quality of a group of lots by the single sampling inspection in destructive case.	7	131-156
ISÉ, Kusuo and NAGUMO, Mitio: On the normal forms of differential equations in the neighborhood of an equi- librium point.	9	223-234
ISHIHARA, Tadashige: On multiple distributions.	6	187-205
— : Addenda to "On multiple distributions."	7	129-130
ITÔ, Noboru: On monomial representations of finite groups.	6	119-117
ITÔ, Seizô: The fundamental solution of the parabolic equation in a differentiable manifold, I.	5	75-92
— : The fundamental solution of the parabolic equation in a differentiable manifold, II.	6	167-185
JACOBSON, Nathan: Structure of alternative and Jordan bimodules.	6	1-71
KAMETANI, Syunzi and ENOMOTO, Shizu: On differentiation of set-functions with some of its applications.	3	1-9
KASUGA, Takashi: On the linear partial differential equation of the first order.	5	211-225
— : On the homogeneous linear partial differen- tial equation of the first order.	7	39-67
— : Supplément to my paper "On the homo- geneous linear partial differential equation of the first order".	8	139-143

KINOSHITA, Shin'ichi : On essential components of the set of fixed points.	4	19-22
: On Wendt's theorem of knots.	9	61-66
: On knots and periodic transformations.	10	43-52
: On Wendt's theorem of knots, II.	10	259-261
: Alexander polynomials as isotopy invariants, I.	10	263-273
and HOMMA, Tatsuo : On a topological char- acterization of the dilatation in E^3	6	135-143
and HOMMA, Tatsuo : On homeomorphisms which are regular except for a finite number of points.	7	29-37
and TERASAKA, Hidetaka : On unions of knots.	9	131-153
and YAJIMA, Takeshi : On the graphs of knots.	9	155-163
KOGO, Kusunori and OGAWA, Junjiro : On the correlation of efficient estimates of unknown parameters.	7	15-22
KOMATU, Atuo : Relations between homotopy and homo- logy, I	1	150-155
KOSHIBA, Zen'ichiro : Remarks on the postulates of metric groups.	3	50-53
KUDO, Tatsuji : Contribution to the problem of stability.	1	62-72
: Classification of topological fibre bundles.	1	156-165
KUNUGUI, Kinjiro : Étude sur la théorie du potentiel généralisé.	2	63-103
KURAMOCHI, Zenjiro : On sufficient conditions for a function to be holomorphic in a domain.	3	21-47
: Potential theory and its applications, I.	3	123-174
: Potential theory and its applications, II.	4	87-99
: A remark on the bounded analytic function.	4	185-190
: On covering surfaces.	5	155-201
: An example of a null-boundary Riemann surfaces.	6	83-91
: On covering property of abstract Riemann surface.	6	93-103
: On the existence of harmonic functions on Riemann surfaces.	7	23-27
: On the behaviour of analytic functions on abstract Riemann surfaces.	7	109-127
: Mass distributions on the ideal boundaries of abstract Riemann surfaces, I.	8	119-137
: Mass distributions on the ideal boundaries of abstract Riemann surfaces, II.	8	145-186
: On the ideal boundaries of abstract Riemann surfaces.	10	83-102

KURAMOCHI, Zenjiro: On harmonic functions representable by Poisson's integral.	10	103-117
: Mass distributions on the ideal boundaries of abstract Riemann surfaces, III.	10	119-136
KURATA, Yoshiki: Decompositions of semi-prime rings and Jordan isomorphisms.	9	189-193
: Some remarks on quasi-Frobenius modules.	10	213-220
KURODA, Tadashi: Theorems of the Phragmén-Lindelöf type on an open Riemann surface.	6	231-241
LOWIG, H. F. J.: On some representations of lattices of law relations.	10	159-180
MATSUMOTO, Kazuo and OHNISHI, Masao: Gentzen method in modal calculi.	9	113-130
Correction.	10	
MATSUMURA, Yoshimi: On modified bent-functions and Phragmén-Lindelöf's principle.	2	33-41
MINAGAWA, Takizo and RADÓ, Tibor: On the infinitesimal rigidity of surfaces.	4	241-285
MORIKAWA, Hisasi: On the invariants of finite nilpotent groups.	10	53-56
MURAKAMI, Shingo: Remarks on the structure of maximally almost periodic groups.	2	119-129
: Algebraic study of fundamental characteristic classes of sphere bundles.	8	187-224
MURASUGI, Kunio: On the Alexander polynomial of the alternating knot.	10	181-189
MURATA, Kentaro: On the quotient semi-group of a non-commutative semi-group.	2	1-5
NAGAI, Osamu: Note on Brauer's theorem of simple groups.	4	113-120
: Supplement to "Note on Brauer's theorem of simple groups".	5	227-232
: On simple groups related to permutation-groups of prime degree I.	8	107-117
NAGAO, Hirosi: The extension of topological groups.	1	36-42
: On the topologies of homeomorphism groups of topological spaces.	1	43-48
: On the theory of representation of finite groups.	3	11-20
NAGATA, Jun'ichi: On lattices of functions on topological spaces and of functions on uniform spaces.	1	166-181
NAGUMO, Mitio: Degree of mapping of manifolds based on that of Euclidean open sets.	2	105-118
: A note on the theory of degree of mapping in Euclidean spaces.	4	1-9

NAGUMO, Mitio : On principally linear elliptic differential equations of the second order.	6	207-229
and ANASAKO, Yukio : On Perron's method for the semilinear hyperbolic system of partial differential equations in two independent variables.	7	179-184
and ISÉ, Kusuo : On the normal forms of differential equations in the neighborhood of an equilibrium point.	9	221-234
NAKAYAMA, Tadashi : On the complete cohomology theory of Frobenius algebras.	9	165-187
and IKEDA, Masatoshi : Supplementary remarks on Frobeniusean algebras, II.	2	7-12
NOBUAWA, Nobuo : An extension of Krull's Galois theory to division rings.	7	1-6
: On compact Galois groups of division rings.	8	43-50
: On a system of valuations of algebraic function fields with several variables.	10	205-212
NOGUCHI, Hiroshi : On regular neighbourhoods of 2-manifolds in 4-Euclidean space, I.	8	225-242
Errata	9	241
OGAWA, Junjiro : Note on the Markoff's theorem on least squares.	2	145-150
: On the independence of quadratic forms in a non-central normal system.	2	151-159
: Contributions to the theory of systematic statistics, I.	3	175-213
: Contributions to the theory of systematic statistics, II.	4	41-67
: Analytical derivation of sampling distribution of intraclass correlation coefficient.	4	69-76
: On the sampling distributions of classical statistics in multivariate analysis.	5	13-51
and KOGO, Kusunori : On the correlation of efficient estimates of unknown parameters.	7	15-22
OHARA, Akiko : La structure du groupe des similitudes directes $GO_6^+(Q)$ sur un corps de caractéristique 2. . .	10	239-257
OHNISHI, Masao : On linearization of ordered groups. . . .	2	161-164
: Linear-order on a group.	4	17-18
: On intuitionistic functional calculus.	5	204-209
and MATSUMOTO, Kazuo : Gentzen method in modal calculi.	9	113-130
Correction.	10	
OKAMOTO, Masashi : On a non-parametric test.	4	77-85

OKAMOTO, Masashi: Unbiasedness in the test of goodness of fit.	4	211-228
: On a certain type of matrices with an application to experimental design.	6	73-82
: Fit of Poisson distribution by the index of dispersion.	7	7-13
ONO, Takashi: Sur la réduction modulo \mathfrak{p} des groupes linéaires algébriques.	10	57-73
RADÓ, Tibor and MINAGAWA, Takizo: On the infinitesimal rigidity of surfaces.	4	241-285
SATO, Kenkichi: On curvature and harmonic forms with values in analytic vector bundles.	10	1-10
SATO, Shoji: On groups and the lattices of subgroups.	1	135-149
: Note on lattice-isomorphisms between abelian groups and non-abelian groups.	3	215-220
: On the lattice homomorphisms of infinite groups, I.	4	229-234
: On the lattice homomorphisms of infinite groups, II.	6	109-118
SHIBATA, Kôichi and TÔKI, Yukinari: On the pseudo-analytic functions.	6	145-165
SIMODA, Seturo: Sur le théorème de Müntz dans la théorie du potentiel.	3	65-75
: Sur théorème d'existence dans les problèmes aux limites pour l'équation $\Delta u = F(x, u, \text{grad } u)$	6	243-268
SHIROTA, Taira: On systems of structures of a completely regular space.	2	131-143
: A class of topological spaces.	4	23-40
: A generalization of a theorem of I. Kaplansky.	4	121-132
: The space of pseudo-metrics on a complete uniform space.	5	147-153
: On Cauchy problem for linear partial differential equations with variable coefficients.	9	43-59
SHODA, Kenjiro: Allgemeine Algebra.	1	182-225
: Zur Theorie der algebraischen Erweiterungen.	4	133-143
: Berichtigungen zu den Arbeiten über die Erweiterungen algebraischer Systeme.	9	239-240
TAKAHASI, Mutuo: On partitions of free products of groups.	1	49-51
: Note on chain conditions in free groups.	3	221-225

TAMURA, Takayuki: Indecomposable completely simple semi-groups except groups.	8	35-42
Errata	9	241
_____: The theory of construction of finite semi-groups I.	8	243-262
Errata	9	241
_____: The theory of construction of finite semi-groups II.	9	1-42
Errata	9	242
_____: Supplement to my paper "The theory of construction of finite semi-groups II".	9	235-237
_____: The theory of construction of finite semi-groups III. Finite unipotent semi-groups.	10	191-204
TARUMOTO, Kōichi and TŌKI, Yukinari: On the pseudo-harmonic functions.	7	103-107
TAO, Junzo: Some properties of $(n-1)$ -manifolds in the Euclidean n -space.	10	137-146
TERASAKA, Hidetaka: Eine topologische Charakterisierung der kongruenten Transformationen in E^n	1	1-35
_____: A topological characterization of affine transformations in E^2	2	23-31
_____: On Cartesian product of compact spaces.	4	11-15
_____ and HOMMA, Tatsuo: On the structure of the plane translation of Brouwer.	5	233-266
_____ and KINOSHITA, Shin'ichi: On unions of knots.	9	131-153
TŌKI, Yukinari: A topological characterization of pseudo-harmonic functions.	3	101-122
_____: On the classification of open Riemann surfaces.	4	191-201
_____: On the examples in the classification of open Riemann surfaces (I).	5	267-280
_____ and SHIBATA, Kēichi: On the pseudo-analytic functions.	6	145-165
_____ and TARUMOTO, Kōichi: On the pseudo-harmonic functions.	7	103-107
TSUBOKO, Matsuji: On a two-dimensional space of projective connection associated with a surface in R_3 . . .	4	101-112
UEHARA, Hiroshi: On homotopy type problems of special kinds of polyhedra I.	4	145-168

UEHARA, Hiroshi: On homotopy type problems of special kinds of polyhedra II.	4	169-184
UTUMI, Yuzo: On hypergroups of group right cosets.	1	73-80
: On quotient rings.	7	1-18
WADA, Junzo: Lattices of spaces.	5	1-12
: One-to-one continuous mappings on locally compact spaces.	8	19-22
: Stonian spaces and the second conjugate spaces of AM spaces.	9	195-200
: Strict convexity and smoothness of normed spaces.	10	221-230
YAJIMA, Takeshi: On a local property of absolute neighbourhood.	2	59-62
and KINOSHITA, Shin'ichi: On the graphs of knots.	9	155-163
YAMABE, Hidehiko: On an arcwise connected subgroup of a Lie group.	2	13-14
: On an extension of the Helly's theorem.	2	15-17
: Note on locally compact groups.	3	77-82
: Kernel functions of diffusion equations (I).	9	201-214
and YUJOOBO, Zuiman: On the continuous function defined on a sphere.	2	19-22
YOSHII, Tensho: Note on generalised uniserial algebras, I.	6	105-107
: On algebras of bounded representation type.	8	51-105
: Supplements and corrections to my paper ; "On algebras of bounded representation type".	9	67-85
: On algebras of left cyclic representation type 12.	10	231-237
YOSHIOKA, Tsunéo: Base canonique d'homologie du produit cyclique d'ordre p d'un complexe fini. (p premier impair).	10	11-29
YOSHIZAWA, Hisaaki: Unitary representations of locally compact groups — reproduction of Gelfand-Raikov's theorem—.	1	81-89
: On some types of convergence of positive definite functions.	1	90-94
: Some remarks on unitary representations of the free group.	3	55-63
YOSIDA, Kôsaku: On the fundamental solution of the parabolic equation in a Riemannian space.	5	65-74
YUJOOBO, Zuiman and YAMABE, Hidehiko: On the continuous function defined on a sphere.	2	19-22
