INDEX

ADACHI, T. and MAEDA, S.: Length spectrum of circles in a complex projective space. 553

AIHARA, Y.: Finiteness theorems for meromorphic mappings. 593

AN, J.: Dade's conjecture for 2-blocks of symmetric groups. 417

BENVENUTI, S. and BOVE, A.: On a class of hyperbolic systems with multiple characteristics. 313

BORDE, P. and PERAIRE, Y.: An approach of the theory of integration by the mean of biased test functions. 771

BOVE, A. and BENVENUTI, S.: On a class of hyperbolic systems with multiple characteristics. 313

ČADEK, M. and VANŽURA, J.: Almost quaternionic structures on eight-manifolds. 165

CARDOSO, F. and VODEV, G.: Asymptotic behaviour of the scattering phase in linear elasticity II. 397

CASALI, M.R.: Average order of coloured triangulations : the general case. 249

CHIGIRA, N.: Finite groups whose abelian subgroups have consecutive orders. ... 439

DELGADO, M. and GUERRA, P.J.: Orlicz classes of Hardy-Littlewood maximal functions. 1

DILLEN, F., SASAKI, T. and VRANCKEN, L.: The classification of projectively homogeneous surfaces II. 117

EI, H. and ITO, S.: Decomposition theorem on invertible substitutions. 821

ENDO, H.: A Construction of Surface Bundles over Surfaces with non-zero Signature. 915

FURUOYA, T. and SHIGA, T.: Sample Lyapunov exponent for a class of linear Markovian systems over $\mathbb{Z}^d$. 35

GUERRA, P.J. and DELGADO, M.: Orlicz classes of Hardy-Littlewood maximal functions. 1

HAYASHIMOTO, A.: On the complete system of finite order for CR mappings and its application. 617

HIJIKATA, H. and NISHIDA, K.: When is $\Lambda_1 \otimes \Lambda_2$ hereditary ?. 493

HINO, M.: Existence of invariant measures for diffusion processes on a wiener space. 717

HOH, W.: A symbolic calculus for pseudo differential operators generating Feller semigroups. 789

HOSHINO, M. and SUMIOKA, T.: Injective pairs in perfect rings. 501

ICHINOSE, T. and TAMURA, H.: Error estimate in operator norm of exponential product formulas for propagators of parabolic evolution equations. 751
ITO, S. and EI, H.: Decomposition theorem on invertible substitutions. 821
ITOH, M.: Compact Einstein-Weyl manifolds and the associated constant. 567
KATO, S.: Uniqueness of solutions of an elliptic singular boundary value problem. 279
KAWAMURA, T.: The unknotting numbers of 10_{139} and 10_{152} are 4. 539
KIM, H.-K. and LEE, M.-H.: Generalized Eichler-Shimura isomorphisms for compact locally symmetric spaces. 407
KINOSHITA, T.: On the wellposedness in the Gevrey classes of the Cauchy problem for weakly hyperbolic systems with Hölder continuous coefficients in time. 735
KOGA, Y.: Commutation relations of vertex operators related with the spin representation of $U_q(D_n^{(1)})$. 447
KUMANO-GO, N.: A proof of H. Kumano-go–Taniguchi theorem for multiproducts of Fourier integral operators. 357
KUWAE, K.: Functional calculus for Dirichlet forms. 683
LEE, M.-H. and KIM, H.-K.: Generalized Eichler-Shimura isomorphisms for compact locally symmetric spaces. 407
LEE, S.Y and PARK, C.-Y.: On the modified Goeritz matrices of 2-periodic links. 529
MAEDA, S. and ADACHI, T.: Length spectrum of circles in a complex projective space. 553
MAITANI, F.: Conformal welding of annuli. 579
MANDAI, T.: Asymptotic solutions and exact solutions for exceptional cases of some characteristic Cauchy problems. 381
MATSUMOTO, K.: Intersection numbers for locarithmic k-forms. 873
MINAMI, H.: Note on complex k-groups of compact Lie groups with fundamental group of prime order. 547
MURAI, M.: Blocks of factor groups and heights of characters. 835
NAKAUCHI, N.: A Liouville type theorem for p-harmonic maps. 303
NISHIDA, K. and HIJIKATA, H.: When is $\Lambda_1 \otimes \Lambda_2$ hereditary ?. 493
NISHIMURA, Y. and YOSIMURA, Z.: The quasi KO_*-types of weighted mod 4 lens spaces. 895
NISHITANI, T. and TAKAYAMA, M.: Characteristic initial boundary value problems for symmetric hyperbolic systems. 629
NISIO, M.: On infinite dimensional stochastic differential games. 15
OGOMA, T.: On a problem of Nagata related to Zariski's problem. 487

PARK, C.-Y. and LEE, S.Y : On the modified Goeritz matrices of 2-periodic links. 529
PERAIRE, Y. and BORDE, P.: An approach of the theory of integration by the mean of biased test functions. 771
SASAKI, T., VRANCKEN, L. and DILLEN, F.: The classification of projectively homogeneous surfaces II. 117
SATO, Y.: 3-dimensional homology handles and minimal second betti numbers of 4-manifolds. 509
SHIGA, T. and FURUOYA, T.: Sample Lyapunov exponent for a class of linear Markovian systems over $\mathbb{Z}^d$. 35
SHIMOKAWA, K.: Incompressibility of closed surfaces in toroidally alternating link complements. 191
SOMA, T.: Spatial-graph isotopy and the rearrangement theorem. 235
SUMIOKA, T. and HOSHINO, M.: Injective pairs in perfect rings. 501
TAKANOBU, S.: On the trace norm estimate of the trotter product formula for Schrödinger operators. 659
TAKAYAMA, M. and NISHITANI, T.: Characteristic initial boundary value problems for symmetric hyperbolic systems. 629
TAKEDA, Y.: On the K-groups of spherical varieties. 73
TAMURA, H. and ICHINOSE, T.: Error estimate in operator norm of exponential product formulas for propagators of parabolic evolution equations. 751
TANIGUCHI, T.: Isolation phenomena for quaternionic Yang-Mills connections. 147
TANNO, S.: Curvatures of the product of two 3-spheres with deformed metrics. 263
VANŽURA, J. and ČADEK, M.: Almost quaternionic structures on eight-manifolds. 165
VODEV, G. and CARDOSO, F.: Asymptotic behaviour of the scattering phase in linear elasticity II. 397
VRANCKEN, L., DILLEN, F. and SASAKI, T.: The classification of projectively homogeneous surfaces II. 117
YAGITA, N.: Localization of the spectral sequence converging to the cohomology of an extra special p-group for odd prime p. 83
YOSHIMURA, H.: FPF rings characterized by two-generated faithful modules. ... 855
YOSIMURA, Z. and NISHIMURA, Y.: The quasi KO_*-types of weighted mod 4 lens spaces. 895

Preparation of Manuscripts

The authors are required to prepare the manuscripts in English, French or German and submit them with extra two copies to

Editor in Chief, Osaka Journal of Mathematics,
Department of Mathematics, Graduate School of Science, Osaka University,
1-1 Machikaneyama-cho, Toyonaka, Osaka 560-0043, Japan

Manuscripts should be typed and legible. Those prepared on TEX should be typeset in 12 point fonts with enough line intervals and margins. The authors are required to observe the following style rules:

1. Abstract or summary should not be attached. The author's address together with his (or her) affiliation is to be written on the last page after the references.

2. In the margin of the first page of the manuscript, write a proposed running head.

3. The references should be quoted by numbers, not by the abbreviations of the names or titles. In the Reference the entries should be written as in the next examples:

   [1] H.F. Baker: *On finite groups*, Canad. J. Math. **25** (1973), 35–48.
   [2] C.M. Davis: Group Theory, Springer, Berlin-Heidelberg-New York, 1965.

4. Theorem, Proposition, Lemma, Corollary should be written as **Theorem, Proposition, Lemma, Corollary** in the bold face, while Definition, Notation, Remark, Example, Acknowledgement should be written in romans as DEFINITION, NOTATION, REMARK, EXAMPLE, ACKNOWLEDGEMENT with small capitals from the second letter on Proof is written in romans.

5. Figures should be drawn in black ink and prepared in separate sheets with adequate numbering.

The authors will be required to make the marking of special letters such as boldface, script, German, Greek letters, etc. following the instruction to be mailed after their articles are accepted for publication by the editorial board.
