NGMPP No. G 129/4.
Another version of Śrīdhara's Vidyāsundara play from Nepal.
Part III.

Makoto Kitada (Osaka University)

Remarks

This is the continuation from Part II. With this Part III, the play is completed.

Besides, this article contains appendixes at the end of this article: Appendix 1 contains my analyses on the Bengali and Prakrit verses contained in the marginal blank of B 276/16. Appendix 2 contains my founding of a comparable story in Amir Khusrau's Persian work.

<Remarks>

I have the impression that this song-verse is perhaps an invention by the redactor. Indeed, *satvala jāyivo* is a frequently used phrase in the dialogues. For the first verse-half, the redactor might have taken the following verse as his model:

koṭavāra-kero mana paḍiro je tave, mālinilo ghare tapāvusa kathā āche // (B 276/16 song 67, verse

[1] Cf. *tapāsa, tapāvāsa* "a search, enquiry"

\<Here is a long blank from l. 2 to l. 3\>   \<Song *101\>

\<Remarks\>

The scribe left the whole space for the rāga and tāla, as well as for the whole verse completely empty. It seems that the scribe intended to fill the blank afterwards. Does it mean that the scribe and the redactor were the same person? Namely, was the scribe the composer of the dialogues? I gave it the number *101 (with asterisk) according to my principle of numbering, although this verse is lacking.

[5] Nw. "have come"
[6] This corresponds to B 276/16 song 67, verse 7 [Kitada 2019a: 39].

<Remarks>

MS song-verses 102abc correspond to the last three verses of B 276/16 song 67 [Kitada 2019a: 39]. The scribe, who seems to be the redactor at the same time, split the song of the source text verse by verse, in that he separated one verse from another, inserting dialogues in between. **<End of remarks>**

15 "[They] take out".

16 Or, *rthi*?

17 Or, *va*?

18 Here, the rāga and tāla are written in a smaller size. This perhaps indicates that the scribe filled them afterwards in the space which he had beforehand left empty.

19 Nw. "Here, the guard gives (*biye*) the yell."

20 "The man (i.e. Prince) went (i.e. took resort) to the laps of Vidyā by his arms (i.e. by embracing)." In contrast, B 276/16 has *vāhu diyā puna se vidyāro thāyi āyilo* "He (= The guard) came to the place (i.e. room) of Vidyā by arms (i.e. scrambling up the shaft by his arms)." I wonder if the redactor of MS altered the subject of the sentence to adjust the verse to the scene on the stage: In this scene, the guard has not yet reached into their room.

21 This corresponds to B 276/16 song 69 (*vibhāsa, jati*) [Kitada 2019a: 40]. The rāga is the same,

// thanā hāka viye //[22]

// hari2 he prāṇeśvarī ki hailo, he (Fol. 52rec, l. 1) prāṇeśvarī suno, //

he prāṇeśvara kaho, //

// rāga madhati, jati, //

// he vidyā, ki vuddhi ki patikāra karivo,, hari2 he priye suno, //

// (l. 6) he prāṇeśvara kaho, //

// rāga madhati, tāla jati, //

narapati guṇasāra tāhā kumāra hame, ye ki prā(l. 7)ṇero vidyā, / sarasvati kaṃthe morā nile, //

padhiyā sāstra sakala, jiniro pandita-vara, / vudhi (Fol. 52ver, l. 1) ghanthā dvāre mora parāne, //

<Song 107a>

// ahe prāṇeśvarī, koṭāra vedhilo, ekhane ki upāya kalivo[25],, hari2 (l. 2) he prāṇeśvarī suno, //

he prāṇeśvara kaho, //

// saya sthita keilo cora, koṭāra vedhiyā pure, / hama laiyo[26] (l. 3) vada adhāntare, //   <Song 107b>

// ahe prāṇeśvarī, koṭala vedhilo, hamāra, avasya, avasthā haye, he (l. 4) prāṇeśvarī suno, //

prāṇeśvara dhirja karo, //

but the tāla is changed.

[22] "Here, [the guard] gives (biye) a yell."

[23] I.e. Beng. madhu-māchi, maumāchi < Skt. madhu-makṣa "a bee". "Prince [who is] the bee, having said to the daughter (jhi, jhiyā = Vidyā): I escape from you."

[24] This corresponds to B 276/16 song 70 (rāga ?, coṣa jati) [Kitada 2019a: 40]. The space for rāga is left empty in B 276/16. The tāla is the same. MS rāga madhati is obscure; perhaps a spelling variant of *mālati?

[25] This speech by Prince seems to presuppose a verse like B 276/16 song 71, verse 3: hari2 koṭāla vedhiyā ghara, parāṇe samāyalo dara, ālo prāṇa vidyā lo āji vidyā kavana parakāre nāye // [Kitada 2019a: 40].

[26] Perhaps mistake for laiyā?

saṃpurṇṇa hoyilo kāla, vāhire ḍāke koṭavā(l. 5)la, / janma moke deho āliṃgaṇe, //

cha-māsero paṃtha hailo,   āsiyā mililo tote, / (l. 6) yethi vidhi hoyilo mora vāme, //

<Remark>
MS songs 107abc correspond to B 276/16 song 71 [Kitada 2019a: 40–41].   **<End of remark>**

[27] The first verse of MS song 107c corresponds to the last verse 7 of B 276/16 song 71. The second and third verses of MS song 107c correspond to B 276/16 song 71, verse 5–6. [Kitada 2019a: 40–41]
[28] This sign is usually used to mark the beginning of a song. But here, it sees not to be the case.
[29] I.e. *bhūmi-to loṭāiẏā "rolling/thrashing around on the earth/floor". In B 276/16, I read bhumiro tāya, / , but it is bhumi rotāyā correctly: The vertical line next to ya is not a daṇḍa, but the ā-kāra.
[30] In my footnote on its equivalent in B 276/16 kāde, I wrote as follows: "The letter kā resembles Bengalī phā; but Beng. kãde '[she] weeps' fits better in the context." [Kitada 2019a: p. 41, fn. 538] Intriguingly, the MS redactor has phāḍe in the first verse.
[31] Obviously, mistake for haitye.
[32] Obviously, mistake for hailo, although the scribe makes the same mistake twice here.

// rāga śrī, paḍiramān·[33] //

<From here, the scribe effaced passages and rewrote new passages over it. Therefore, it is extremely difficult to decipher what he actually wrote. Specially, the dialogue ll. 4–5 is almost illegible.>

<Remarks>

MS songs 109abc correspond to the first seven verses of B 276/16 song 73 (*pahadiyā, paḍimāna*) [Kitada 2019a: 42]. The correspondence will be resumed with MS song-verse 109g (see below).

Here is the motif of the hero's transvesting himself and stealing into the princess' private room. I wonder if this work served as a source of idea for the play Lakṣmīpriyā staged on the Kārtik Nāc festival 2016, in which the hero disguised as a flower woman and stole into the princess' room, and in which the scene of execution of the hero is the highlight of the tragedy, cf. Kitada [2020a: 218].

<End of remarks>

[33] Peculiarly, it has the *virāma*.

[34] < Beng. *sāpaṭa-/sāpuṭa-* "to hold tightly together" "to grip" [Sen 1971: 875].

[35] Or, is it better to read *kāḍhiyā*, according to B 276/16 *kādhiyā* (Beng. *kārhiyā*)?

[36] This verse corresponds to B 276/16 song 75, verse 6 [Kitada 2019a: 42]. In reconstruction, I relied on that version.

[37] It seems that the scribe here falsely wrote the dialogue beginning with *duṣṭa* (cf. now situated at the end of l. 7), then effaced it. In fact, the vague traces of *cinhite na pālive* are still recognizable (cf. this phrase now situated in l. 1 of the next folio).

[38] Although extremely unclear, I can slightly see some words like *purukha abharana chādi(l. 6)yā, nāli abharaṇa pahirāva*. That means, Vidyā tells Prince to take off his male clothes, and put on female clothes. This suits well to the contents of the verses, too.

[39] For this line, it seems that the scribe first wrote the verse *e vola suniyā …* , then he effaced it, and rewrote the verse *nāri abharana …* over. For comparison, I quote its equivalent in B 276/16 song 75, verse 7: *tiri ābharaṇa pahiriyā āge lakhite na pāre nārīra saṃge //* "Wearing ladies' ornaments, [Prince] cannot be distinguished (Beng. *lakṣa-*) from women."

⁴⁰ I.e. Beng. *khāi* "a pit, hole". The vowel sign also looks like the *ā-kāra*. In that case, it would be *khāvā*.
⁴¹ Corresponding to B 276/16 song 73, verse 16.
⁴² Exceptionally, Fol. 54ver and Fol. 55rec have a flower-formed decoration around the hole for the string of binding folios, situated in the middle of the folio. In other pages, the square space around the hole is usually left empty.
⁴³ Corresponding to B 276/16 song 73, verse 17 [Kitada 2019a: 43]

[44] The character named Candrakalā is here mentioned for the first time. B 276/16 has *tārāvati* instead.

[45] Corresponding to B 276/16, verse 18 [Kitada 2019a: 43]

[46] Corresponding to B 276/16 song 73, verse 20

[47] < *lajjāvatī* "shameful". The guard speaks to Prince disguised as a woman who pretends to be too bashful to offer herself willingly to be body-checked by him.

[48] Corresponding to B 276/16 song 73, verse 22

[49] In my footnote on its equivalent in B 276/16 song 73, verse 21, I have argued that *o kule*, instead of reading *ākule*, might be the proper reading [Kitada 2019a: p. 43, fn. 569]. My presumption is now confirmed by MS.

[50] I.e. *paḍila mohe* "[Prince] fell in dismay."

[51] Corresponding to B 276/16 song 73, verse 21.

[52] Obviously, mistake for *ke*.

[53] This seems to correspond to B 276/16 song 73, verse 23: *lilāya kumāra dhāyira pāye   dhara2*

<Remark>

As remarked in the respective footnotes, MS song-verses 109g–109o correspond to the sequence of B 276/16 song 73, verses 16–23 [Kitada 2019a: 43].   **<End of remark>**

<Remarks>

MS song 113a, verse 1, shows some resemblance to B 276/16 song 75, verses 1 and 2 (i.e. *dhruvapada*)
[Kitada 2019a: 44]:

---

[60] The scribe amended *re* into *te*, or conversely.
[61] The first verse-half is a recapture of MS song 110b.
[62] The *virāma*.
[63] Obviously, mistake for *hailo*.
[64] Beng. *paṛe*

Besides, this scene seems to approximately correspond to the beginning of folio 27 of the Chittagong manuscript [Śarīph 1957: 132]. In the Chittagong manuscript, the pages between Folio 8 and Folio 27 are missing. [Kitada 2021a: 4f.] Using the two Nepalese versions (MS and B 276/16), this blank in the Chittagong manuscript could be made up.   **<End of remarks>**

<Remarks>

MS songs 114ab correspond to B 276/16 song 76 (*śrī rāga, chutā*) [Kitada 2019a: 44]. On the other hand, B 276/16 song 76 has, between the equivalent of MS 114a and that of 114b, the insertion of a *dhruvapada*: *na māra na māra kvaṭāra duḥkha sarvva gāya [/] dekhite na pāyi vṛddha vāpa māye //dhru//*   **<End of remarks>**

vidyā gati vidyā sthiti, vidyā prāṇa dāne, / (l. 7) prāṇa vidyā chādi moke, āna nahi gati, //

---

[65] B 276/16 *chāta hāthe*. Does this perhaps reflect the pronunciation of the *cha*-letter as [s] in the Eastern dialect of the Bengali language?
[66] It seems, the scribe amended *the* into *te*, to make the rhyme agree (i.e. *hāte − sāte*). The scribe obviously understand *sāte* as meaning "seven". In contrast, B 276/16 has *hāthe – sāthe*. There, *janā paṃca sāthe* would mean "five persons together".
[67] Perhaps, a shortened form of *māhi* "inside"?

<Song 114c>

<Remarks>

MS 114ab and 114c compose one song. However, MS 114c corresponds to another song, i.e. B 276/16
song 78 (*śrī rāga, chutā*) [Kitada 2019a: 44].   **<End of remarks>**

<Remarks>

MS songs 115ab correspond to B 276/16 song 82 (*valāli, jati*) [Kitada 2019a: 45]. Besides, the verses
of MS song 115a find their equivalents in the Chittagong version (*śrī rāga*) [Śarīph 1957: 133, ll. 8ff.],
although with approximate wording:
śrī rāmera priyā sītā harila rābaṇe // rāma bāṇe chedileka daśa kandha śire /
For the phrase *lalāṭe likhita vidyā phalilo amāre* in MS song 115b, an equivalent is found in the
Chittagong version: lalāṭe-likhana-duḥkha abaśya bhugiba [Śarīph 1957: 133, l. 5].
<End of remarks>

// he prāṇeśvarī, tume āpuna vāsā jāho, //

<Remark>

The Sanskrit verse is the first verse of the Caurapañcāśikā in Tadpatrikar's edition[77]. The verse runs:

adyāpi tāṃ kanaka-campaka-dāma-gaurīṃ phullāravinda-vadanāṃ tanu-roma-rājim /

suptotthitāṃ madana-vihvala-lālasāṅgīṃ vidyāṃ pramāda-guṇitām iva cintayāmi //

MS song 118 is its translation into Bengali. Peculiarly, the Bengali translation contains *guniyā* in place of *galitāṃ* in the Sanskrit verse. *Guniyā* is in accordance to the Tadpatrikar's version. Obviously, the scribe used another version of Caurapañcāśikā than the version on which the Bengali translation is based.

In fact, in Fol. 59ver, the scribe has left a wide blank for filling a Sanskrit verse in it afterwards.

[78] The *avagraha*.
[79] This *ṃ* looks like the Bengali *m̐*-sign (ŋ).
[80] This also seems to be a Caurapañcāśikā verse, but is not found in Tadpatrikar's edition.
[81] The space for the rāga and tāla is left empty.
[82] Maybe mistake for *māhārāje*?
[83] After *ni*, there is a strange stroke and the trace of an effaced letter. I take it for the trace of the scribe's amendment.
[84] I.e. *pīna*
[85] The first verse is the Bengali translation of the third verse of the Caurapancāśikā in Tadpatrikar's edition:
adyāpi tāṃ yadi punaḥ kamalākṣīṃ paśyāmi pīvara-payodhara-bhāra-khinnām /
saṃpīḍya bāhu-yugalena pibāmi vaktram unmattavan-madhukaraḥ kamalaṃ yatheṣṭam //
[86] The scribe amended a letter (*ga*?) into *va*. It is likely that the scribe falsely wrote the next *ga*-letter. Or else, this letter looks like blotted out. Maybe, it is actually *vāda-vāgini*.

Appendix 1

On the Bengali and Prakrit verses written in the blank space at the end of the Vidyāvinoda play in B 276/16

§1. Bengali verses

In the blank space of the lower half of B 276/16, page 29, the following passages are written [Kitada 2019a: 47]:

payāla,   āna deva na cinti/ro[92] āna[93] na ti 9[94]

payāla, ādiha kanaka caṃpā[95]   10

śauri, tuhmi kvaṭavāra ahma paradeśi 11

In my argument on the passages in question [Kitada 2019a: 47], I have pointed out that the first passage (*āna deva na cintiro āna na ti*) shows the parallelism to B 276/16 song 78 [Kitada 2019a: 44]:

// *śrī rāga* // *chutā* //

āna deva nā rādhiro āna nahi mane,   pramāda padire vidyā citte sarvva khane /

vidyā gati vidyā mati vidyā prāṇa dāne   eka vāra vidyā sane karu madhu pane //78 //

As already noted, MS song 114c (MS Fol. 57rec, ll. 5−7) is the equivalent of this B 276/16 song 78:

āna deva na cinta mai, āna nahi mane, / pramāda gunilo vidyā, cinta sarvva khāne, //

vidyā gati vidyā sthiti, vidyā prāṇa dāne, / prāṇa vidyā chādi moke, āna nahi gati, //   <Song 114c>

Intriguingly, this MS equivalent contains *cinta* intead of *rādhiro*. It is nearer to the fragmental passage *āna deva na cinti/ro āna na ti*!

The next passage *ādiha kanaka caṃpā* is not found in other places in B 276/16, but it is the beginning of MS song 118 (MS Fol. 59rec, ll. 2−4)!

---

[92] Perhaps, it was a halfway reproduction of the original Bengali script *cintiro. The scribe retained the Bengali *e-kāra* (set to the left of the *ra*-letter), although he wrote the Newari *e-kāra* (i.e. the horizontal line in wave).

[93] Or, *ma*. However, I prefer to reading *āna* (< *anya*).

[94] It has parallelism to the first verse of B 276/16 song No. 78 (B 276/16, p. 27, ll. 8−9): *āna deva nā rādhiro āna nahi mane*.

[95] This letter might look like *yā* or *vā*, but it is obviously Newari *pā*.

// rāga śavari, palatāli, //

āji-ho kanaka-campā, jene rūpavati, / tanu-romarāji-mukhi, kamala-adhipati, //

cintiyā āchilo suyā, madana arāse, / pramāda guniyā vidyā, uthilo tarāse, //   <Song 118>

This is the translation of the Caurapañcāśikā-verse quoted just before:

śloka

adyāpi tāṃ kaṅkana-campaka-dāma-gaurī, phullāla-vindu-vadanāṃ tanu-roma-rājiṃ, /

suptoḥsthitā-madana-vihvala-lālaśāṃgīṃ, vidyāḥ pramāda-galitāṃ, miva cintayāmi, //

This fact indicates that the scribe of B 276/16 knew this song, although he omitted it from his version of text.[96] That means, the scribe of B 276/16 had a source text which contained this song. Thus, his source text, i.e. an earlier version of Śrīdhara's Vidyāsundara, must have contained the scene, in which the Caurapancāśikā verses were recited.

§2. Betterment of the Prakrit and Sanskrit verses in B 276/16, p. 30

In the following is the ameliorated version of the transliteration of the Prakrit and Sanskrit verses [cf. Kitada 2019a: 47−48].

(B 276/16, p. 30, l. 1)

ℒ uttuṃga-pīna-kaṭhina-stana-maṇḍalasmin· pattrāvaliṃ racaya kuṃkuma-karddamena /

āliṃganena jaghanaṃ saphalaṃ kurusva, duḥkhaṃ (2) vināśaya vibho madano bha[97]vaṃ me //

taha ughuṭa[102]muṇā(3)lo[103] ta[o][104] diṭṭi[105] de[o] cakkāo //[106]

---

[96] Supposing that who added the note of this passage is the same person as the scribe. The writing hand seems to be the same.

[97] I read *bha* instead of *ha*.

[98] Or, *pudui*

[99] Or, *tu*, or *u*?

[100] Or, *havio*. Pkt. *dāhaviya-* "āg lagvāyā huā"? Or, it is maybe better to read *vāhario*.

[101] Or: *ve*? But Pkt. *vāhar-* "to speak, to call"?

[102] Pkt. *ugghuṭṭha*? Or, *uvvuṭa/udduṭa/uppuṭa*?

[103] Pkt. *muṇāla* < Skt. *mṛṇāla*? Or, *suṇālo*?

[104] This letter resembles *ja* without the horizontal line. It has occurred in p. 29, l. 4 ([?]*ndrera*). I have the feeling that it represents a certain vowel, but I do not have any further idea.

[105] Pkt. *diṭṭhi* < Skt. *dṛṣṭi*? Or, *diddi*?

[106] It seems to mean something like [the beautiful woman] has rubbed a lotus-fibre (*udghṛṣṭa-mṛṇāla*), and her sights are cycles (i.e. her eyes are twinkling).

[111] Or, *mu/mva/sva*?

[112] It looks like *purṇa*, but *purṇa* is impossible in Prakrit.

[113] The letter resembling *ja/ga* without the horizontal line. It might represent *o* which often occurs at the word-ending in Prakrit.

[114] Pkt. *uahasa* < Skt. *upahasa*?

[115] Or, *tamāra*, i.e. **tamāla*? However, in this Prakrit poem, the Newari confusion of *r* and *l* does otherwise not occur.

[116] Skt. *kesara-śikhāḥ*? If my reading, Pkt. *kesara-sihāo*, is correct, the letter resembling *ja* without the horizontal line must represent *o*.

[117] Skt. *avataṃsayanti*

[118] Abbreviation of *vidyā*

[119] Abbreviation of *kumāra*

[120] I.e. *karabha + ūru*

is narrated in the chapter titled: "The Bud of Spring of the Flower-faced Lady opens due to Tasty Wine and she, like a Nightingale, tells a Tale of Lovers" (*Ǧunčah gušādan-i-bahār-i-gulrūy az bādhā-yi-xuš u bulbulvār afsānah-yi-'āšiqān guftan*) [dhul-Fiqārī & Arasṭū 1391: 223ff. = verses 1637ff.].

The story is as follows:

A group of five young men from Multān [dhul-Fiqārī & Arasṭū 1391: p. 223, verse 1636] travels. On the way, they see a temple of idols (*butxānah*) in the desert. This temple contain a masterpiece of stone statue, named Kāmrānī [ibid. p. 224, verse 1658], whose beauty takes their breath away. One of them, the son of an aristocrat, is irresistibly enamored with this idol and does not want anymore to continue the travel. Being at a loss by his stubbornness not to move, his friends leave him in the temple staring the idol in stupefaction, and themselves enter the nearby city to seek the solution. During their stay, the young men happen to know the secret that this stone statue is in fact the portrait of a beautiful lady, i.e. the beloved of the king of the city, who is confined in a lofty tower enclosed in a garden adjacent to the royal palace. They get also the information that only an old flower woman is permitted to visit the lady to provide flowers. They approach the flower woman and win over her by bribery of a deluge of money and goods. One of the young men is a talented gardener [ibid. p. 238f., verses 1702ff.]. He makes splendid bouquets and lets the flower woman deliver these to the lady. The lady admires the wonder of exquisite workmanship, and coaxes the secret out of the flower woman. The old woman, having no other choice, is compelled to tell her the truth that a foreign gardener lodges at her house and it is he that made all these bouquets. The next day, the gardener selects all sorts of flowers and weaves an elaborate tapestry of flower in which a portrait of the lady is presented and also a text of letter addressed to her is knitted in alphabets of flowers [ibid. p. 230, verses 1754ff.]. Completely fascinated at the sight of this work of prodigy, and profoundly affected by her own portrait and name embroidered with flower in the fabric, the lady has an ardent wish to see the man who made the tapestry and entreats the flower woman to arrange her tryst with him. At the report by the flower woman who has come back home, the five comrades think out a design: One of them is a son of a wealthy merchant. He purchases an estate in the city, and gets a mansion built there [ibid. p. 233, 1809]. Another one of them is a miner. He clandestinely digs a long tunnel leading from their mansion to beneath the lofty building in which the lady is confined [ibid. p. 232, verse 1798; p. 233, verse 1816].

Noteworthy is the fact that the five young men come from Multān, one of the western centers of commerce and culture in the subcontinent[121], and also that Kāmrānī is mentioned as the name of the stone statue. The meaning of this name is explained in verse 1658 as follows:

---

[121] Multān is famous for its being the center of Sufism. However, its name seems to come from the Apabhraṃśa word *mūlatthāna* (< *mūla-sthāna*) and this city seems to have been flourishing since long time before Islamization.

"In the languages of Hindus/Indians (*zabānhā-yi-hindvān*), *kām* means love (*'išq*) and *rānī*, a woman (*zan*)."

In fact, *kām-rānī* (< Skt. *kāma-rājñī*) would mean the Queen of the God of Love in New Indo-Aryan languages. Here, Amīr Khusrau makes a pun of words, for, in Persian, *kāmrānī* means "fulfillment of desire" or "success". It is supposed to be a Hindu goddess who grants wishes.

These features suggest that the source of this story is an Indian folktale of Hindu origin. The common features between this tale and the Vidyāsundara are as follows: (1) A woman is confined (or confines herself willingly) in her abode, inaccessible to men, or refusing to see men. (2) The flower woman is an exception who is granted the admission to the place of the lady. (3) The gardener weaves bouquets, and let the flower woman delivers these to the lady. (4) Finally, an underground path is dug up to the room of the lady. Only, there is a difference that in Amīr Khusrau's tale are the five comrades who cooperate to attain their aim, in contrast to Prince Sundara in the Vidyāsundara, who makes everything alone for himself.

Probably, Amīr Khusrau composed this tale after the model of a version of Vidyāsundara current in his time.
