Osaka University
ERRATA TO
“GROWTH OF EQUIVARIANT HARMONIC MAPS
AND HARMONIC MORPHISMS”

ATSUSHI KASUE and TAKUMI WASHIO

This Journal, vol. 27 (1990), 899–928
(Received September 2, 1991)

1. The first condition (1) of Theorem 3.2 (p.923) should be corrected as follows:
   (1) The Ricci curvature $\text{Ricci}_M$ of $M$ satisfies
   \[ (0 \leq) \text{Ricci}_M \leq \frac{c_1}{r_M^2} \]
   for some constant $c_1 > 0$, and moreover the injectivity radius $\text{inj}_M(x)$ of $M$ grows at
   least linearly, namely,
   \[ \text{inj}_M(x) \geq c_2 r_M(x) \]
   for some constant $c_2 > 0$.

2. Correspondingly the second remark just after Theorem 3.2 should be read
   as follows:
   (2) In Theorem 3.2, we can replace condition (1) with the following:
   (1)' The sectional curvature $K_M$ of $M$ satisfies
   \[ K_M \leq \frac{c_1}{r_M^2} \]
   for some constant $c_1 > 0$, and moreover $M$ has the maximal volume growth, namely,
   \[ \text{Vol}(B_M(t)) \geq c_2 t^m \]
   for some constant $c_2 > 0$, where $m=\dim M$.
   In fact, we can derive condition (3.2) from these conditions (3.1)' and
   (3.2)' together with the nonnegativity of the Ricci curvature of $M$ (cf. [10]).

3. Finally, reference [10] should be replaced with the following:
