Appendix 2: supplementary results appendix to “Global burden and strength of evidence for 88 risk factors in 204 countries and 811 subnational locations, 1990–2021: a systematic analysis for the Global Burden of Disease Study 2021”

This supplement provides additional figures and tables containing more detailed results for “Global burden and strength of evidence for 88 risk factors in 204 countries and 811 subnational locations, 1990–2021: a systematic analysis for the Global Burden of Disease Study 2021”

The results are available in an interactive data downloading tool in the Global Health Data Exchange (GHDx): vizhub.healthdata.org/gbd-results. The tool contains the complete set of results from all GBD 2021 papers. Specialised tables from the papers will be available as separate entries in the GHDx,
