Figure captions:

Fig. 1 Overall graft survival by donor age : The Kaplan Myer curve showed patient survival by donor age. There was no stastically significance. ($P = .26$)

Fig. 2 Graft survival by donor age in cadaveric donor : The Kaplan Myer curve showed patient survival by donor age in cadaveric donor. There was no stastically significance. ($P = .75$)

Fig. 3 Graft survival by donor age in living donor: The Kaplan Myer curve showed patient survival by donor age in living donor. There was stastically significance. ($P = .045$)
